

SkillDNA AI – Decode Your Potential, Design Your Future

Investor brief • GenAI Hackathon • Visionary career intelligence for students and universities

What problem are we solving?

Millions of graduates lack clarity about their true skills, career fit, and why applications fail. Existing solutions often analyze only resumes or suggest courses — they don't build a living, evolving profile that guides actionable skill development and career decisions.

- 📄 Audience: Engineering & college students, fresh graduates, placement cells, and EdTech decision-makers.

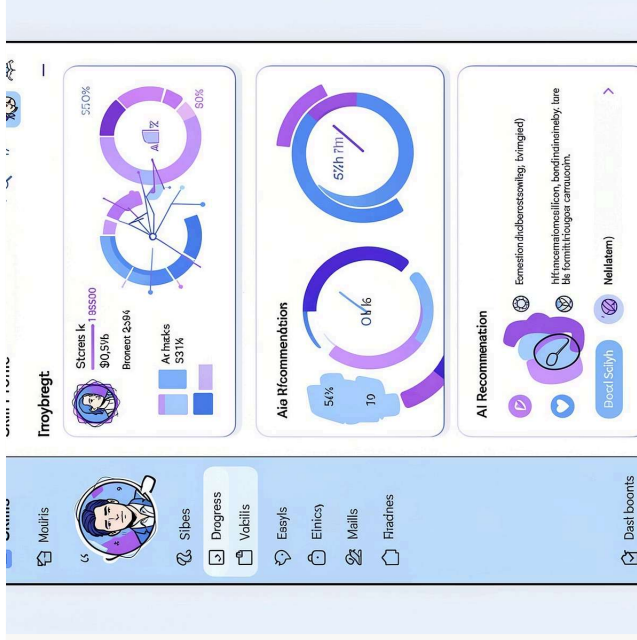

Gamma automatically saves your work for you.

Our solution — SkillDNA AI (at a glance)

We create a continuously evolving Digital Skill DNA by analyzing resumes, projects, certificates, GitHub, and learning history. The platform identifies strengths, gaps, hidden talents, and generates personalized roadmaps, project recommendations, interview practice, and an AI mentor for ongoing career growth.

Core features

AI Resume Analyzer
Context-aware parsing and scoring of role fit and achievements.

Personalized Roadmaps
Actionable learning paths with curated

Smart Skill Extraction
LLM-driven extraction from text, code, and project artifacts.

SkillDNA Dashboard
Visual Skill DNA profile that evolves as the user learns and builds.

Hidden Talent Detection
Discover latent strengths from projects and extracurriculars.

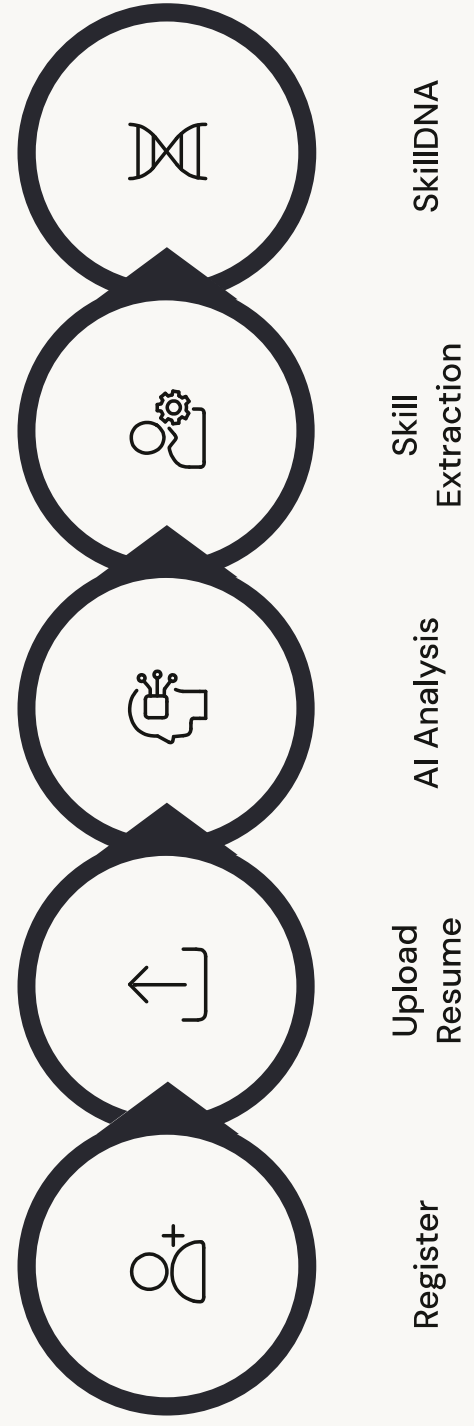

AI Mock Interviewer & Mentor
Contextual

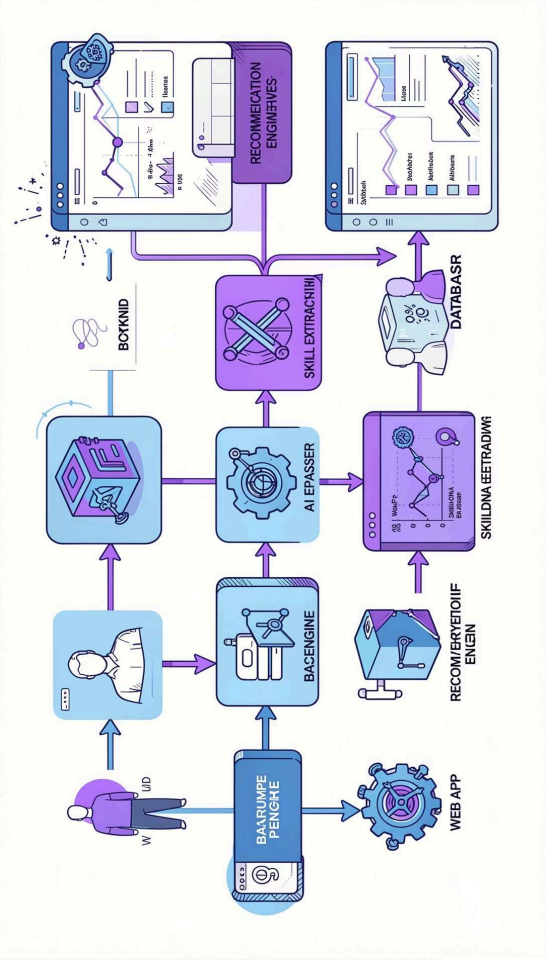

Gamma automatically saves your work for you.

Workflow — from sign-up to placement

This seamless pipeline turns raw artifacts into a dynamic SkillDNA, then into prioritized actions and measurable progress.

System architecture

Components

- Frontend: React + Tailwind
- Backend: FastAPI (Python)
- Database: PostgreSQL
- AI: OpenAI/Gemini, LangChain, sentence-transformers
- Deployment: Docker, Vercel, Render

Key AI techniques: LLMs, RAG, embeddings, resume parsing, explainable recommendations.

Innovation — what makes SkillDNA AI unique

Dynamic SkillDNA

A living profile that updates as users learn, project, and validate skills.

Hidden Talent Discovery

Unearth non-obvious strengths from diverse artifacts and activities.

Career Multiverse Simulator

Compare multiple career paths and see projected skill trajectories.

AI Mentor & Mock Interviews

Personalized coaching with explainable feedback and practice scenarios.

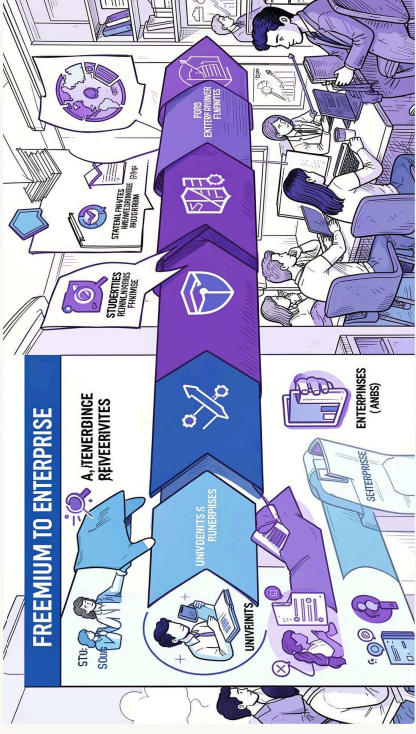

Market & business model

Gamma automatically saves your work for you.

Go-to-market: Campus pilots, placement cell partnerships, EdTech integrations.

- Freemium for students
- Premium AI Career Coach (subscription)
- University & placement cell subscriptions
- Enterprise recruitment analytics

Monetization balances wide user adoption with high-value institutional contracts.

Roadmap & future scope

Every student has hidden potential.

SkillIDNA AI helps discover it, develop it, and transform it into career success.

THANK YOU

SkillDNA AI

Decode Your Potential. Design Your Future.

"Every student has hidden potential. SkillDNA AI helps discover it, develop it, and transform it into career success."
